

BE FISH

It maneuvers old style and is primarily performed in pipes

The hand behind it goes to grabbare among the feet the blade of the heels.

To be able to do this, the table must have rotated of about thirty degrees toward the frontlit and the free arm must be stretched on the axle of the shoulder and to its height.

Also in this case, they are the legs that go toward the hand that grabba, this trick has the advantage not to unbalance a lot.

Ago a lot of old style and is primarily performed in pipes; on the jumps is generally combined to rotations back side. If performed during those frontside it is a manoeuvre all to discover.
